We use a variety of packaging materials to ship and protect our products. The following overview helps to identify the materials used and how to dispose of them properly.

Wherever possible, we use recyclable packaging made from paper, cardboard, or mono-materials, combining product protection with resource conservation. At the same time, we continuously review our packaging solutions and look for suitable alternatives to further improve material use, recyclability, and reusability.

The information provided is based on the most current data available from our suppliers and is updated on an ongoing basis.

> **Observe regional requirements**
> Please observe the local disposal regulations of your country or region.

Material Overview and Recycling Codes

Packaging type	Material	Recycling code
Shipping carton Product carton Pallet cap	Corrugated cardboard	**PAP 20**
Edge protector	Solid board	**PAP 21**
Document pouch (paper) Masking tape Envelope Gusset envelope Paper tape Paper cushioning Shipping label Desiccant bag (version A)	Paper	**PAP 22**
Desiccant bag (version B)	PE-HD nonwoven	**HDPE 02**
Stretch film Bubble wrap Document pouch (PE) Grip-seal bag Foam insert (version A)	Polyethylene (high-pressure PE/LDPE) PE-LAM30 white PE-LAM-AS pink	**LDPE 04**

Packaging type	Material	Recycling code
ESD shielding bag	Polyethylene/polyester	–
Strapping band	Polyethylene terephthalate (PET)	**PET 01**
Foam insert (version B)	PU AS pink	–
Packing tape	Polypropylene (PP)	**PP 05**
Adhesive tape	Polyvinyl chloride (PVC)	**PVC 03**
Sealing clips, galvanized	Wire	**FE 40**
Wooden pallet Wooden crate	Wood	**FOR 50**
Folitop® aluminum composite film	High-density polyethylene (HDPE)/aluminum	**C/HDPE 90**
Desiccant (content)	Montmorillonite/bentonite	–
Anti-slip mat	Rubber granulate, bound with PUR	–

– No recycling code assigned
